Chilean Culture Collection of Microbial Genetic Resources
Current research and future work plans

INIA - CHILE
Beijing, October 2017
Overview

- Country background
- Ecological zones and Biological diversity
- Origins of culture collection
- Main emphasis
  - Biological control
  - Plant growth promoters
  - Industrial uses
- Future work
CHILE GEOGRAPHY

• Located in the Southwest side of South America.
• Unique shape country.
• 4,300 km long.
• From Atacama desert to Tierra del Fuego.
• 6,453 Km of coast.
• 90 to 445 km wide.
• From sea cost to 6,893 m.
• 8 ecological zones along the country
